

Create Azure Free Account

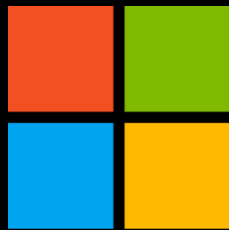

Get \$200 Free Credit

First, we need a new email address

**In this video, let's create a
new Outlook email account.**

Microsoft

If we create our email using Outlook,
a Microsoft account will already
be set up for us.

**Otherwise, go ahead and
create a new Microsoft account
using that fresh email.**

Log In with Incognito Mode

Log into your Microsoft account using an incognito or private browser window.

This helps avoid session issues during the signup process.

Important

**This email must not be associated with
any existing Microsoft or Azure account.**

**If you already have a Microsoft account
that hasn't been used for Azure,
you're good to go.**

That's it!

**You're ready to
start building with Azure!**
